

PRIVATE SEWAGE DISPOSAL PERMIT APPLICATION

A *Sewage Disposal Permit Application* is attached for you to complete. If you are building a new house you must also notify the Regional Planning Commissioner at the Livingston County Courthouse or the Zoning Administrator for your municipality.

You may install the private sewage disposal system yourself if the system is for your own personal residence or you may use a State Licensed Contractor. If you plan a subsurface seepage field as part of your septic system, a soils investigation must be performed by a State of Illinois licensed soil classifier or a registered engineer and a copy of the results returned with the permit application and any applicable fee to the Livingston County Public Health Department. Upon approval of your system plan, the Livingston County Public Health Department will issue a *Permit to Construct or Alter a Sewage Disposal System*.

If you install the system yourself, you must notify the Livingston County Public Health Department at least 48 hours in advance so arrangements can be made for Health Department personnel to be present on the site before you begin excavating and again before covering the system for final inspection and approval.

If you employ a second party to install the system, that party must be a contractor licensed by the Illinois Department of Public Health. The contractor must also notify the Livingston County Public Health Department 48 hours in advance before covering the system for final inspection and approval.

If you have any questions, please contact this Department prior to beginning any construction. Personnel will assist you as much as possible to insure an approved, efficient septic system for your residence.

Donnie Simmons, L.E.H.P.
Director of Environmental Health

PLOT PLAN OF SEWAGE DISPOSAL SYSTEM

INDICATE THE FOLLOWING:

- 1. Lot Size
- 2. Septic Tank Location, Size and Minimum Distances Required to the following:
 - a. Building. 5'
 - b. Seepage Field. 5'
 - c. Wells. 50'
 - d. Water Lines:
 - Pressure water line. 10'
 - Suction water line. 50'
 - e. Lake, Stream, Other Body of Water or In-ground Swimming Pool. 25'
- 3. Subsurface Field Location, Dimensions and Minimum Distances Required to the following:
 - a. Building. 10'
 - b. Wells. 75'
 - c. Water Lines:
 - Pressure water line. 25'
 - Suction water line. 75'
 - d. Artificial Drain. 10'
 - e. Property Line. 5'
 - f. Lake, Stream, Other Body of Water or In-ground Swimming Pool. 25'
- 4. Site Slope
- 5. Subsurface Seepage Field cross section indicating separation distance to seasonal high water (if present).
